PROFESSIONAL SUMMARY

Technical Product Analyst with 3+ years of experience at Deloitte USI delivering secure, scalable cloud and data platform capabilities across GCP and AWS. Proven track record translating complex business logic into developer specifications, managing end-to-end tool migrations, and designing API flows for high-volume financial and reconciliation pipelines. MBA candidate (Project Management) skilled in Agile ceremonies, backlog grooming, and cross-functional release governance to drive product strategy.

CORE SKILLS

- Product & Lifecycle Management: Requirements Translation (PRD/BRD), Agile/Scrum Methodologies, Jira & Confluence, Backlog Prioritization, User Stories & Acceptance Criteria, Change Management
- Technical & Data Domain: Database Schema Evolution, SQL Querying & Optimization, Cloud Concepts (GCP, AWS), BigQuery, Dataform, API Flow Design, Python Scripting
- Analysis & Operations: Impact & Risk Analysis, Process Mapping, Power BI Dashboards, Technical Walkthroughs, Developer Onboarding, Incident Triage & SLA Maintenance

---

PROFESSIONAL EXPERIENCE

Deloitte Consulting (USI)

Associate Analyst (Functional Technical Product Analyst) | *Feb 2023 – Present*

Project: Central Texas Regional Mobility Authority (CTRMA) – Cloud Platform ***(Oct 2023 – Present)***

- Internal Tool Lifecycle Management: Led the end-to-end migration of legacy data workflows to Dataform on GCP; managed the transition by creating structured training materials and onboarding 15+ engineering teammates and cross-functional stakeholders to drive 100% platform adoption.
- Requirements Translation: Collaborated directly with business stakeholders to translate complex financial workflows into technical logic, resulting in the successful implementation of customized filtering systems for high-volume reconciliation reporting covering over [Insert Number/Volume] daily transactions.
- Risk & Schema Management: Conducted detailed impact analyses prior to deploying critical database schema upgrades (such as column transitions across transactional tables), ensuring zero downtime and complete data integrity during release execution.

- Technical Specifications & Documentation: Authored enterprise-grade reference guides, functional specifications, and walkthrough documents for key system APIs (including retry and download interfaces), core pricing logic, and system architectures.
- Feature Delivery & Backlog Triage: Managed regular issue tracking, defect verification, and bug triage workflows; partnered with developer teams to stabilize test environments and resolve data pipeline discrepancies.

Project: Sanofi CH Safety – Healthcare Process Support ***(Feb 2023 – Oct 2023)***

- Operational Workflow Optimization: Monitored high-volume daily data flows on AWS, proactively identifying processing delays and coordinating with engineers to resolve pipeline bottlenecks before they impacted operations.
- Process Automation: Developed lightweight Python automation scripts to handle routine operational validation checks, reducing manual QA effort by ~30% (saving roughly 6–8 engineering hours per week) and increasing daily data processing consistency.
- Stakeholder Dashboards: Created and maintained interactive Power BI reports to provide project leadership and compliance stakeholders with transparent, real-time visibility into system health, error rates, and operational metrics.

EDUCATION

- MBA in Project Management | DY Patil College, Pune | *Expected Completion: Nov 2026*
- B.Sc. in Computer Science | Indira College of Commerce and Science, Pune | *Graduated: 2022*

CERTIFICATIONS & BADGES

- GPS Generative AI Fundamentalist – Deloitte
- GitHub Copilot Fundamentals & Developer Use Cases for AI with GitHub Copilot
- Deloitte AI Academy Generative AI Fluency & Tech Savvy Generative AI
- Master the Art of Prompt Engineering

COMMUNITY WORK

- Volunteer, Arshi Society (NGO): Assisted in coordinating community welfare programs and grassroots social outreach activities.
